We bring nature into your space.

Evergreen Moss Premium, colours: moss green and soft green mix, tree made of typical bark trunk and 714 moss spheres, project: FertighausWelt Götting, image: BDF

Freund Moosmanufaktur is an integral part of **Freund GmbH**. As experienced trading partner and manufacturer of decorative materials for wall coverings, we were looking for vertical indoor greenery, which does not need care or watering. In 2007, we had achieved our first positive results by making moss durable, therefore creating an indoor vegetation solution with moss pictures and moss walls, accessible for a broader public. Since 2008 we are on the market with our moss products, and as one of the first manufacturers in Europe, have co-founded the trend of natural indoor moss walls.

We exclusively use real moss and plants to produce our green wall elements. Our production process begins with a strong focus on sustainability: We carefully harvest only individual moss areas by hand to not disturb its natural growth.

The natural moss is cleaned in a resource-friendly way and preserved, it then gets its intense colour by natural colourants, which we then turn into our key products **Evergreen, Greenhill and Greenwood**.

In the next stage, we use our moss factory to create hand-crafted, unique moss pictures and walls. We always keep in mind to ensure that the elements are easy to install and that our customers get a detailed project consultation.

The moss types **Evergreen, Greenhill** and **Greenwood** differ in look and feel:

Evergreen Moss
Soft reindeer moss
with a sponge-like texture

Greenhill Moss
Round cushion moss
(also bun moss) with 3D optics

Greenwood Moss
Short, flat forest moss –
Combines perfectly with ferns, etc.

Especially **Evergreen Premium** moss impresses with its unique soft feel. Image: Corinna Jacobs

Thanks to a special procedure for the preservation of our **Evergreen Moss** (reindeer moss), **Greenhill Moss** (cushion / bun moss) and **Greenwood Moss** (forest moss), the natural materials retain their fresh green colour and the moss pictures, as well as walls, do not require any artificial lighting, care or feeding.

We use MDF-panels as carrier material for our maintenance-free moss products, which can be exchanged by hardly inflammable (B1), flexible (HDF-glass fiber) or moisture-repellent carrier materials if required. Of course, we also produce more complex customer ideas, such as cladding of columns, large objects or even entire cubes (interior).

The evergreen elements are exceptionally impressive within an indoor space, when various moss types are combined or unique variants are used.

Considering the manual and delicate labor that goes into the production, we can literally be called a manufactory. Our moss products are exclusively produced in Germany.

YOUR BENEFITS:

-  100 % natural moss
-  Made in Germany
-  Sound absorbing
-  No care
-  No maintenance
-  No follow-up costs
-  Easy to install
-  No irrigation

EVERGREEN MOSS PREMIUM

The evergreen moss pictures and walls made of **Evergreen Moss Premium** are the highlight in your spaces and do not require any light, irrigation or feeding. Those features currently make our dense evergreen wall panels one of our most sought after products.

Through its subtle texture and big surface that evolve out of it, the moss florets appear very soft and "fluffy." The viewer is naturally inclined to touch the soft moss pictures and walls and explore the different sensations of the natural moss on their skin.

CHOOSE BETWEEN 15 COLOURS

standard colours:

moss green*

forest green*

apple green*

special colours:

sky blue*

ocean blue*

olive*

black*

* The reindeer moss is a natural material that can be dyed in different colours. Because moss is a natural product and because of its presentation (e.g., indoor, outdoor, different lighting and so forth), the actual colours might differ from the images.

SURFACE TEXTURE

Florets of reindeer moss
approx. height 1.57 to 1.96 inch (40 to 50 mm)
fixed + tacked on

Black MDF-carrier panel
approx. height 0.39 inch (10 mm)

EVERGREEN MOSS PREMIUM

- **Unique manufacturing: We double-attach the Evergreen Moss Premium to the carrier panel**
- Individualized to customer requirements, tailor-made design
- Excellent pattern repetition
- Standard sizes available, round and square
- Optional individual forms (e.g., room divider, world map, free form, 2D and 3D versions, etc.)
- Optional moss frame and split battens
- Available in 15 colours
- Fire protection B1 upon request*
- Sound absorbing up to 90 %
- Carrier exchangeable (fulfills the requirements for fire protection, moisture resistance and flexibility)

CERTIFIED FOR ACOUSTICS AND FIRE PROTECTION

The sound absorbing properties - approximately 90 % -, as well as fire preventive features of our moss, have been confirmed and certified by various laboratories.

EVERGREEN MOSS PREMIUM: IT IS YOUR CHOICE!

From a small moss picture to a large surface area: **Evergreen Moss Premium** has a calming effect, regulating indoor climate and absorbing sound.

For a more natural look, it is also possible to cover the frame of your moss picture with moss instead of aluminium or wood. For this, the moss is pulled over the edges, which gives the impression of moss growing directly out of the wall.

Evergreen Moss Premium, without moss on the side panels

Evergreen Moss Premium, with optional moss on the side panels (moss frame) (image: Kumpel)

Additionally, you can order split battens from us so the green "artworks" can be installed quickly and directly onto the wall.

Split battens

CORNER SOLUTIONS

If the **Evergreen Moss Premium** is mounted onto objects with more than one side, which is leading to corners, a few things must be considered:

Inner corner:

An MDF-carrier is directly fitted to the wall, the other carrier panel is about 1.57 inch (40 mm) smaller to prevent that the moss is pressed against each other.

Outer corner:

To avoid a visible panel corner, one of the moss panels is produced cantilevered 1.18 inch (30 mm) to the other carrier panel, which will be covered with moss on the sides.

Evergreen Moss Premium, colour: apple green, moss picture with lateral moss frame, 2 pictures steel 39.37 x 18.42 inch (1000 x 2500 mm), project: skandinavien kitchen RAVOHNEN, image: studio.be

MULTICOLOURED MOSS PICTURES

It is also possible to create different coloured pictures made of moss, for example, based on a vector file. This leads to wide-ranging design possibilities regarding individual corporate design requirements.

We are happy to help you with the technical preparation and realization.

Right (from the top down):

- 1 Vector file
- 2 Coloured vector file
- 3 Finished picture with four different moss colours

100 % natural moss

Made in Germany

Sound absorbing

No care

No maintenance

No follow-up costs

Easy to install

No irrigation

A real alternative to 'do-it yourself' moss installation is our **Moosgreen Flexible** product solution. The flexible panels with 100 % reindeer moss are perfect for simple self-installations.

The natural moss pictures can be flat, convex or concave around objects or can be installed as moss wall. This leads to endless possibilities in decorating spaces with moss. Put the surface into the right light and show off your moss picture or your moss wall.

Easy installation of the moss panels is guaranteed: They are attached to a wooden subsurface with a stapler (an electric one for instance), screwed together or directly glued. One package includes five panels, either in moss green or apple green.

CHOOSE BETWEEN 2 COLOURS*

moss green apple green

MOOSGREEN FLEXIBLE

- Standard format: each panel is 14.96 x 22.83 inch (380 x 580 mm)
- One sales unit includes five panels in one package (equals a surface of 1.1m²)
- Simple cutting and installation
- Fire protection B1 upon request
- Sound absorbing up to 90 %
- Available in moss green and apple green*
- Can be assembled in various ways

Moosgreen Flexible, Karton

* Upon request and for a small additional fee the product can be manufactured in one of the custom colours. (see page 10).

SURFACE TEXTURE

Florets of reindeer moss approx. height 1.57 to 1.96 inch (40 to 50 mm) fixed on

Flexible carrier panel (HDF, felt or glass fiber) approx. height 0.11 inch (3 mm)

Moosgreen Flexible (straight), colour: moss green

Moosgreen Flexible (curved), colour: moss green

The moss panels can be either stapled, screwed or directly glued to a wooden subsurface.

Moosgreen Flexible, colour: moss green,
project: Luffhansa Magazin, image: Weyer + Grill

Our popular moss product is flexible in many ways:

Due to its curved material, the moss panels can be used in various ways; around corners or on bulges like columns, framed, on walls or counters - there are almost endless creative possibilities.

You can cut the panels with simple tools (like a cutter knife) according to your wishes and needs.

The standard sizes of the single panels make storage and transport easier. This is the reason why we are able to deliver our **Moosgreen Flexible** for your dream project relatively short-notice. This flexibility is especially appreciated by our customers.

Moss columns with Moosgreen Flexible, colour: moss green, project: Shoes Lounge in Airo Kawasaki, Japan
image: Magnus Photography / www.magnusphotography.com

Whether as small moss picture or covering an entire wall, **Greenhill Moss** objects are always a green work of art. The round cushion moss is popular when creating extravagant walls, ceilings, and object designs.

The sound-absorbing qualities of the moss pictures significantly contribute to your well-being in your private living space or your working area.

Upon request, Greenhill can be individually designed by us and for example, create an impressive 3D effect on curved carrier elements.

SURFACE TEXTURE

Different sized hills of cushion / bun moss
approx. height 1.18 to 2.36 inch (30 to 60 mm)

For the LEMKEN AGROFARM project, **Greenhill Moss** was used by Freund Moosmanufaktur to create perfect wellness oases within a modern office space. In line with this, the corporate design was brought into a natural context.

Large wall pictures create a calm and comfortable feeling with the otherwise clear designed meeting rooms. An oversized picture made from Greenhill Moss, which is located in the lounge area, impresses employers and visitors alike.

The individually designed moss letters in the lobby of the large company, located in the Westphalian Alpen, are the real highlight.

GREENHILL PUZZLE: REINVENTING THE CUSHION MOSS PANEL.

Close-up centre panel Greenhill Puzzle, colour: moss green; image: KOMPE IMAGES for Freund GmbH

Experience has taught us that the Greenhill moss is one of our most sought-after products. The transition of the natural round shapes, as well as the organic structure of the mosses, is often an issue on rectangular base panels, and may not be processed professionally. The creation of visible edges is not something we want to see in our products, which are supposed to appear natural.

We at Freund Moosmanufaktur worked on this issue for quite some time and came up with a new type of base panel, which allowed us to solve the problem of unclear-looking edges.

We are proud to present the result of our hard work in our new product: **GREENHILL PUZZLE**.

Showroom of Freund GmbH displaying a Greenhill Puzzle moss wall, size: approx. 10 sqm (107.6 sq ft) combined with a water wall, ergonomic office furniture by Reischer Büromöbelwerk as well as tree sculptures by Peter Wagenkötter

- 100% natural moss
- Made in Germany
- Sound absorbing
- No care

- No maintenance
- No follow-up costs
- Easy to install
- No irrigation

GREENHILL PUZZLE: REINVENTING THE CUSHION MOSS PANEL.

THE PUZZLE SYSTEM

With this new Freund product, we pass on the added use as well as value to our clients and their projects without raising the price.

The **Greenhill Puzzle** conceals the cushion / bun moss, which is mounted on 5 mm (0.19 inch) strong MDF panels. These are produced as systems and made up of base panels, edge panels and corners. Uniting the individual modules allows an assembly without visible edges or transitions.

EXPAND AND COMBINE INFINITELY

The custom-fit serration of the three puzzle types, base panel, edge panel and corner allow a smooth and seamless

ADVANTAGES

- No transitions: joint free installation of the puzzle system
- Swift assembly: installation of a 10 sqm (107.6 sq ft) surface in around 4 hours
- Colours: moss green and apple green
- Short delivery time in stock, thus, available

Installation of moss pictures or moss walls. This design allows for an infinite modular expansion of the moss surface.

ALSO AVAILABLE IN APPLGREEN

The system is available in the colours moss green and apple green. The colours can also be mixed since all the modules are compatible with each other.

Please note that this achieves a puzzle piece effect since the edges will then become visible.

Visualisation moss surface system, top: colour: moss green and apple green mixed, bottom: colour: moss green, images: KOMPE IMAGES for Freund GmbH

Greenhill Puzzle panel, colour: apple green, image: KOMPE IMAGES for Freund GmbH

THE ASSEMBLY: SWIFT AND EASY

The interlocking modules enable an effortless installation of the system. Please consult our installation guide for perfect results:

1 Always start the installation at the bottom (if needed with the help of a wooden strip) and work your way up. Image: Freund GmbH

2 Utilise the help of another person during the installation; this allows one person to press the panels firmly against the wall while the other screws them tight. Image: Freund GmbH

3 Ideally, the installation is carried out on a carrier panel. Keep an eye out for small gaps in the moss for placing the screws during the installation of our product. Image: Freund GmbH

TOOLS/PREPARATION

- Gloves
- Cordless screwdriver
- Screws (length varies depending on the underlying surface/substructure)
- Yardstick or measuring tape
- Spirit level for correct alignment

If you want a moss wall design that cannot be divided according to the number of modules, it is possible to cut the edges as desired. For this, we recommend using

- Safety glasses
- Hand-held circular saw with guiding rail
- Cutter for post-processing

For more information about the installation, please visit our website: <https://freund-moosmanufaktur.de/en>

Images: KOMPE IMAGES for Freund GmbH

GREENWOOD MOSS

Greenwood Moss pictures and walls are made from real, low-grown forest moss.

Greenwood Moss invites the viewer to take a step back, breathe and relax. At the same time, a rustic-original feeling of well-being is created with our forest moss.

The Greenwood forest moss pictures and walls can be designed flat (2D) or hilly (3D), depending on customer requirements. They can also be combined with other materials by taking wood, plants or ferns to create interesting three-dimensional landscapes and a very authentic forest atmosphere. Perfect for a relaxing vibe especially in hotels, wellness and spa areas, but also in restaurants or cafes.

SURFACE TEXTURE

Real forest moss
approx. height 0.39 to
0.78 inch (10 to 20 mm)
fixed on
MDF-carrier panel
approx. height 0.47 inch
(12 mm)

GREENWOOD MOSS

- Individually tailored to customer requirements, excellent pattern repeatability
- Standard sizes available, round and square
- Optional shapes (e.g. room divider, world map, free form, etc.)
- Optional moss paneling on the sides (moss frame)
- Combines well with hills; other mosses, preserved plants, woods, ferns, etc. (**Greenwood Extra** or **Greenwood Jungle**)
- Fire protection B1 upon request
- Sound absorbing

Greenwood Moss 3D, project: Grüner Salon, Bamnet according to architect's layout, dimensions: H x W x D: 86.61 x 149.60 x 11.81 inch (2200 x 3860 x 300 mm), Image: Freund GmbH

Greenwood Moss wall made from naturally preserved forest moss, project: Hotel Eder in Maria Alm at the Hochkönig, image: michael huber | www.huber-fotografie.at

With our **Greenwood Extra** and **Greenwood Jungle** products, it is possible to add cushioned moss hills, preserved plants as well as grass, wood or stone elements to the moss pictures. The "forest-like" texture gives each space a fascinating character, the perfect presentation of an indoor forest idyll or even jungle optics.

In combination with smart lighting, this leads to a particularly impressive effect. Such installations are stylish highlights, for example at fairs, in beauty salons and shops, in wellness areas or dining spaces, or as larger than life artworks for showrooms.

Greenwood Jungle, project: Greenhouse, ZAL – Center of Applied Aeronautical Research, in cooperation with Nudt Hamburg, image: Ralf Korrermann

GREENWOOD EXTRA

When producing this product, one plant island per square meter of moss area is used, consisting of three hills of cushion / bun moss, individual ferns, and branches.

GREENWOOD JUNGLE

This option is a much denser variant, where we add preserved plants, grass, and ferns to your Greenwood Moss picture, all tailored to your individual requirements.

FAQ - OUR ANSWER TO THE MOST IMPORTANT QUESTIONS

What type of moss is used in the moss pictures and moss walls created by Freund Moosmanufaktur?

Here at Moosmanufaktur we only work with real moss. For Evergreen Moss and Moosgreen Flexible, we use a reindeer moss, for Greenhill Moss a cushion (turf) moss and for Greenwood Moss a forest moss. The moss is cleaned, partly dyed, preserved and then attached to a carrier panel.

What is the depth of the moss pictures and moss surfaces?

We usually use a 0.39 inch (1 cm) strong MDF-carrier panel as a foundation, on which the approximate 1.18 to 2.75 inch (3 to 7cm) thick and preserved moss is attached to. The base panel can also be changed upon request. When ordering Evergreen Moss Premium, Greenhill Moss or Greenwood Moss, a moss frame, which overlaps the panel corners by 1.18 inch (3 cm), and the individual split battens can be ordered upon request.

What is a moss frame?

The moss is arranged neatly around the corners of the MDF-carrier panel, this ensures that the panel itself cannot be seen anymore.

What exactly are fixing strips?

The split battens allow you to easily mount and remove the moss to and from the walls. One batten is already attached to the back of the moss panel, the respective batten for the wall is included as well. Another option is to mount the moss surfaces directly onto a carrier panel.

Which shapes and sizes are available?

All shapes and sizes are possible. 2D as well as 3D. We individually design your project and, as the manufacturer, we can realize almost every idea you have.

Do the moss pictures and walls need any special maintenance?

None of our moss pictures and moss walls need any grooming, watering, lighting or feeding.

For all our moss products we recommend a room humidity between 40 and 60 % to preserve its haptic and optical features. If the humidity drops below this recommended threshold, a change in the moss texture can occur. Dry air during the winter can make the moss thicker and therefore change its haptics. The moss will become soft and fresh once the humidity returns to its recommended levels.

Where can you buy our moss pictures and walls?

You can get all the unique pieces presented here at Freund GmbH and its partners only. Since 2008, we are the manufacturer and vendor of the Evergreen Moss Premium, Moosgreen Flexible, Greenhill Moss and Greenwood Moss products.
